HO THE PHONG

FULL-STACK DEVELOPER | JAVA · SPRING BOOT · NESTJS

Hanoi | fonght.dev@gmail.com | +84 978541603 | ***GitHub*** *|* ***Portfolio***

SUMMARY

Software Engineering graduate from FPT University (program completed in 2026) with hands-on full-stack experience in Java (Spring Boot), TypeScript (NestJS, React) and Flutter. Built secure REST APIs (JWT, role-based access), background job queues and push notifications for a post-operative monitoring system developed with Thanh Nhan Hospital, and delivered features, tests and code reviews at Smart Lab, FPT University.

SKILLS

Languages	Java, TypeScript, JavaScript
Frontend	React, TailwindCSS, Flutter
Backend	NestJS, Spring Boot, Node.js, REST APIs
Databases	MySQL, PostgreSQL, MSSQL, Redis
Tools	Git, Docker, Firebase (FCM), TypeORM

PROJECTS

POMS – Post-Operative Monitoring System (Capstone, team of 5). GitHub
NestJS, PostgreSQL, Redis, Docker, React, Flutter

- Developed with Thanh Nhan Hospital's ERAS research team to monitor post-operative patients; implemented triage logic in the backend.
- Built NestJS/PostgreSQL backend (Clean Architecture, 11 modules): JWT auth with role-based access, TypeORM migrations, Swagger docs, 399 E2E tests.
- Implemented Redis/Bull queues (delayed auto-completion, reminders), scheduled jobs, and FCM push notifications with auto-lock for critical alerts.
- Contributed FE tasks on the React admin dashboard and Flutter mobile app; ESLint/Prettier with Husky hooks.

CompassEd – AI-powered online learning platform. GitHub
Java, Spring Boot, MySQL, Flask, JavaScript, OpenAI API, VNPay, Docker

- Built Spring Boot/MySQL backend (20+ REST APIs): JWT auth, user management, placement tests, learning roadmaps, and mini/final tests with auto-unlock and level promotion.
- Full-stack: Flask/JavaScript frontend; integrated OpenAI API and VNPay (sandbox) payment.

EXPERIENCE

Full-Stack Developer - SMART LAB | FPT University *2024 - 2025*

- Developed and tested web application features using Java and Spring Boot in a collaborative team.
- Contributed to a university-wide USB-based offline examination system using .NET, implementing exam processing, result storage, and bug fixes.

EDUCATION

FPT University, Hanoi – Bachelor of Software Engineering *2022 - 2026*

- Relevant coursework: Software Engineering, Web Development, Database Systems, Software Testing.

ADDITIONAL INFORMATION

- **Languages:** Vietnamese - *native*, English - *intermediate*
